Hazardous waste containers and container storage areas must be inspected weekly, looking for leaks and for container deterioration. The inspection log must include the dates and findings of these inspections. Additional items to be checked at the time of inspection should include but are not limited to:

1. Ensuring that all containers are closed
2. Ensuring that all containers are labeled "Hazardous Waste"
3. Ensuring that all containers included clear descriptions of their contents
4. Ensuring that all containers include an accumulation start date
5. Ensuring that adequate aisle space is maintained in the storage areas to allow the unobstructed movement of personnel, fire protection equipment, spill control equipment, and decontamination equipment to access any container in the storage area

If problems are noted during an inspection (damage or leaking drum, etc.), then indicate the problem on the first page of this form, and describe what was done to correct the problem on the second page of this form.
